Outstanding Design Results In Magical Movement and Pure Silence

D-Lite Lift ensures flawless “open and close” movement with innovative “hinge-less” technology.

MOCHA

ANTHRACITE

GREY

WHITE

Provides great colour alternatives with Anthracite, Mocha, Grey and White colour options.

**Soft and silent movement
features provide maximum
comfort.**

With its gradual-open mechanism,
cabinet doors can be stopped at a
desired level.

“Fully mechanic”
lifting structure provides
lifetime stability.

3D Adjustment

D-Lite Lift's three dimensional alignment mechanism enables flawless installation.

D-Lite Lift Aluminium Frame Solution

1

The stopper is used to limit the opening angle of 90°.

Lower the arm.

3

Remove the existing stopper.

4

Insert the 90° stopper.

If, when the door is released, it rises instead of remaining in position, turn in direction "A," and if it descends, turn in direction "B" in order to adjust balance.

Low braking at setting 1, High braking at setting 4.

If the door closes too fast or too slowly, you can adjust the strength of the soft closing mechanism by adjusting from the specified position.

Important: Do not force the adjustment mechanism beyond the end point.

SAFETY INFORMATION

Caution:
Lever arm can spring up and cause injury.
